DANISH LABOR FOR ENGLAND.

Men May Be Imported to Work as Farm Hands.

London, May 12.—A plan to employ Danish labor on British farm lands has been announced by the board of agriculture. It is stated that the Central Labor Exchange Department of the board of trade will try to obtain the farm hands to work in agricultural districts in England and Wales, which are outside the prohibited areas. Farmers wishing to procure these men must promise them employment for not less than a year, however, and must agree to give them reasonably good board and pay them the average wages of the district. They must pay in advance the passage money from Denmark, about £2 (£15) for third-class passage. The men it is proposed to bring into England would be between 18 and 25 who have worked in Denmark on dairy or other farms.

U. S. ADS FOR ARGENTINA.

Buenos Ayres, May 12.—An American advertising man has begun the erection in this city of what is said to be one of the largest display fields in the world and most certainly the largest in South America. The field is a mile long, extending from the railroad terminal station to Palermo, and paralleling the tracks of the three big lines, the Central Argentine, the Pacific and the Central Cordoba. Along the mile field will be erected huge signs of steel, cut in the design of the article advertised. None will be less than 160 square feet nor more than 500 square feet. Owing to their size and to guard against destruction they will be built with heavy steel supports set in concrete.
